

# RITCHEY OUTBACK

Tom Ritchey rides about 10,000 miles (16,000 km) per year, and most of that is off-road. Combine that with his more than 50 years of designing and building bicycles, and it's no wonder the Outback has become an icon in the gritty world of gravel and adventure bikes.

Wrapped in its new Granite & Snow paint, the Outback sports several practical and adaptable features that offer riders the ability to chase epic ride experiences beyond the end of the road and the end of the day. Rack and fender mounts help to keep things dry and expand the load-carrying capacity for longer bikepacking adventures, while clearance for 700c x 48mm or 650b x 2.0in tires opens up a whole new world of possibilities. Doubling down on the Outback's practical performance, an all-carbon fiber Ritchey Adventure Fork with multi-purpose mounts on the legs gives you more places to stow the supplies you gather at the last café.

The Outback is painstakingly TIG-welded with proprietary triple-buttressed Ritchey Logic steel tubing that now features a longer taper profile on the butt, which makes the tube stronger farther along its length. Additionally, the Outback now sports an updated one-piece dropout for flat mount brakes that features a unique truss design offering the same reliable strength but with less weight.

Bikepacking, road, off-road, trail, expedition, you name it...the Ritchey Outback is designed to do it all.

## SPECIFICATIONS

- Sizes: XS, S, M, L, XL
- Heat-treated, triple-buttressed Ritchey Logic tubeset
- Flat-mount brake compatibility
- Thru-axles in front and rear
- TIG-welded
- Rack and fender mounts
- New Ritchey Adventure Fork with multi-purpose mounts
